DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3 and 8-23, drawn to an article dispenser under class 221, subclass 223.

Group II, claims 24-26, drawn to a change maker under class 453, subclass 2.

Group III, claim 27, drawn to a remote monitoring system under class 340, subclass 540.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The dispensing unit of Group I could be utilized as a dispenser for any rod-shaped items and the monitoring system of Group III could be used in remote banking devices such as ATMs.

A telephone call was made to Mr. Jonathan Grad on 29 September 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
